

# Planting Calendar

For temperate/cool temperate  
areas of Australia

## This pdf gives you printable pages

There is one card for every calendar month. The size is equivalent to a standard 3 x 5 inch systems filing card so you can either print directly onto thick card or print on paper and then glue to cards.

## Frost Tender Vegetables

All varieties in **red and marked with ❄️** are frost tender. Tomatoes, capsicums and eggplants, in particular, should be grown as seedlings in a warm spot (cold frame or solarium) to get an early start.

Seeds of frost tender varieties can be sown one or two weeks before the last possible frost (if you are into gambling!) A plastic cloche covering the bed or row will also help extend the growing season.

## Shade

Some vegetable seed will not germinate in hot weather. Shade is essential for the varieties marked in green.

All seedlings benefit from being under 50% shade cloth on hot, windy days and it is possible to extend the growing season for less heat tolerant varieties such as English Spinach by growing them under shade cloth in summer.

## Planting Schedule

### • Large Kitchen Gardens & CSAs

One planting once every month will suffice to give year round harvesting. However, if it is possible sow several varieties of the one vegetable to extend the picking dates.

### • Restaurant Suppliers & Larger Scale Market Gardeners

Planting will have to be done more often. In the warmer months the smaller, fast growing crops such as lettuces, salad mix, radishes.... will have to be sown every 1–2 weeks to ensure consistent harvesting.

### • Ensuring Plenty Of Salad Greens For Winter

In cold areas growth slows down to almost nothing in the middle of winter. To ensure continuous harvesting of greens it is important to 'plant EXTRA seeds' in the autumn months. This is indicated on the cards.

<b>July</b>		<i>Under 10 hrs of Daylight</i>
<b>Grow Seedlings</b>	<b>Sow Straight Into Ground</b>	
Broccoli—Winter Varieties Chinese Leafy Greens—Mizuna, Pak Choi, Senposai... Keeping Varieties Onions—Brown & Red	Mesclun Salad Mix	

<b>August</b>		<i>Back Over 10 hrs of Daylight</i>
<b>Grow Seedlings</b>	<b>Sow Straight Into Ground</b>	
Broccoli—Winter Varieties Celeriac Chinese Leafy Greens—Mizuna, Pak Choi, Senposai... Leeks	Coriander English Spinach Peas—Shelling Varieties, Snow & Sugar Snap Mesclun Salad Mix Radish	

<b>September</b>		
<b>Grow Seedlings</b>	<b>Sow Straight Into Ground</b>	
Broccoli (Winter Variety) Cabbage—Early Ball Heads, Sugar- loaf <b>Capiscums</b> Celeriac Chinese Leafy Greens—Mizuna, Pak Choi, Senposai... <b>Eggplants</b> Endive Leeks Lettuce—Cos, Salad Bowl Silverbeet Spring Onions	Beetroot Coriander English Spinach Mesclun Salad Mix Peas—Shelling, Snow &sugar Snap Peas <b>Potatoes *</b> Radish Rocket	

<b>October</b>		
<b>Grow Seedlings</b>	<b>Sow Straight Into Ground</b>	
<b>Basil *</b> Celeriac Celery Endive Leeks Lettuce—Cos, Salad Bowl/ Parsley Silverbeet Spring Onions <b>Tomatoes *</b>	Beetroot Coriander English Spinach Mesclun Salad Mix <b>Potatoes *</b> Radish Rocket	

# November

**\*Last Frost\***

Grow Seedlings	Sow Straight Into Ground
<b>Basil</b> Brussel Sprouts Cabbage--Savoy, Red Celeriac Celery Endive Leeks Lettuce--Cos, Salad Bowl, Head Radicchio Silverbeet Spring Onions	<b>Beans *</b> Beetroot Carrots Coriander * <b>Cucumbers</b> <b>Melons</b> Mesclun Salad Mix Parsnips Peas--Snow, Sugar Snap <b>Potatoes *</b> <b>Pumpkins *</b> Rocket * Squash * Sweetcorn *

# December

Grow Seedlings	Sow Straight Into Ground
<b>Basil *</b> Broccoli Cabbage--Red, Ball Head Cauliflower Celeriac Endive, Radicchio, Scarola, Pan di Zucchero Kale Leeks <b>Lettuce--Head</b> Silverbeet Spring Onions	<b>Beans *</b> Beetroot Carrots Coriander * <b>Cucumbers *</b> Florence Fennel <b>Mesclun Salad Mix</b> <b>Parsnips</b> Peas--Snow, Sugar Snap <b>Potatoes *</b> Radish Rocket * <b>Squash *</b> Sweetcorn *

# January

Grow Seedlings	Sow Straight Into Ground
